

Please read the following case study and answer the questions.

John was feeling unwell and complaining of feeling hot and sick, was coughing a lot and didn't want anything to eat. His mother didn't think there was any reason to call a doctor because he was not in much pain and didn't have difficulty in breathing, but sat quietly watching his favourite video.

1. Why did John's mum know that he was not well?

2. Why did she decide not to call the doctor?

Please read the following case study and answer the questions.

Baby Jenny was fretful and showed little interest in anything and her parents realised that she was not very well. She then developed a fever, was sick and had a convulsion. Her parents decided that it was time to contact a doctor.

1. Why did Jenny's parents know that she was not very well?

2. What changes took place in Jenny's condition that required a visit to the doctor?
