

## Assignment: Common Signs of Illness in Babies and Young Children

For this assignment you must create a checklist of the common signs of illness in babies and young children and the appropriate response to those signs.

You may do this by answering the following questions. You might wish to print the following page and write your answers there.

- What are the common signs of illness in babies and young children?
- What are the general symptoms of the common illnesses that babies and young children experience?
- In what circumstances do we **not** need to contact a doctor or the hospital when a child is sick? What should we do instead?
- In what circumstances should a child see a doctor when ill?
- When should you call 999 or 112 if a child is sick?

What are the common signs of illness in babies and young children?

What are the general symptoms of the common illnesses that babies and young children experience?

In what circumstances do we not need to contact a doctor or the hospital when a child is sick? What should we do instead?

In what circumstances should a child see a doctor when ill?

When should you call 999 or 112 if a child is sick?
